

MATHEMA

The Mathematics Association, Gargi College,
University of Delhi

Galileo said "Mathematics is a language, God has written the universe in " and at MATHEMA, we work with the obstinate intention of bringing this language out of textbooks and giving it an identity beyond its theorems. The word "Mathematics" was derived from the Greek word MATHEMA meaning "that which is learnt" and hence learning and growing is our driving factor.

Over these years , we have come a long way in inculcating more events , reaching more people and providing better learning experiences. While each new session brings its own difficulties , we are determined to overcome them and provide an immense number of opportunities to restore a connection between students and this subject. Throughout the session a number of events , which include article writing competition , photography competition , webinar, seminars, online reel making competition , quiz competitions and career counselling sessions are conducted keeping in mind the hidden potential of this subject to wield its gravity in every field and corner of this world. Our annual magazine Mathologic is an inevitable part of this journey giving students a chance to discover mathematics and its significance in new and unthinkable arenas through its pages.

The family of MATHEMA is incomplete without it's teachers who form the backbone of the association and together , motivated by our ultimate intention , we constantly work for finding better ways to make students embrace mathematics amid their hectic day to day lives, help them learn more with each day, introduce them to new opportunities and career options, guide them for pursuing what is best for them and fill them with experience and confidence. We look forward to all upcoming sessions and the roller coaster of excitement, difficulties and learning they'll bring along. We believe in working and growing together to keep our legacy of never getting disheartened before we reach our final goal of celebrating this subject and it's incessant importance.

Faculty Advisors of The Mathematics Association 2022-23

Ms. Arshmeet Kaur
Convener

Ms. Bhawna Kapoor

Ms. Sapna Malhotra
Teacher Incharge

Ms. Anshika Agrawal

Dr. Deepika Dhall

Members of The Mathematics Association 2022-23

Anushka Raghav
President

Tareeshi Mittal
Vice President

Perna Panghal
General Secretary

Niharika
Editorial Head

Pallavi Raj
Head of Public Relation

Lavina Goyal
Treasurer

Raima
Creative Head

Ishita Soni
Co-Creative Head
