College fest

Best thing about college is its societies which give an opportunity to engage with like minded people and groom yourself in the area of your interest.

The English and Psychology department have one of the most empathetic faculty members who listen to the students. The societies can do extremely well if given more free hand.

Great campus

Botanical garden

Totally ok

Good nature of all teachers.

The best thing about my college is that every day in the college is a new learning day where we get to explore new areas of knowledge and activities as frequent activities like lecture-demonstration workshops, panel discussions, lectures by guest speakers, competitions, fests, etc. are organized by various departments and societies. Sometimes there are so many activities being conducted at the same time in the ECA that it becomes difficult and exciting for the students to choose the activity to attend/participate in. Our teachers provide us the freedom to organize these activities or interactions with teachers and students based on our own ideas mingled with their guidance and experience that the whole process becomes a great learning experience for the student to understand the process of organizing things, work in groups, and develop confidence while gaining knowledge from these activities.

Nescafe
