

Feedback Applied Psychology (Hons) 2015-2020

Feedback Form Alumni

Any other feedback/suggestions

The psychology department of Gargi has probably the best thing that has happened to me. The environment that is created for growth and learning is something that has continued to inspire me even in my master's program. It's very rare to find professors like the ones at Gargi who check up on me even today and are there if I need them at any point.

I have a suggestion regarding the mid-terms and final exams. I think it could be more beneficial if there were some application questions rather than theoretical questions in the exams for our courses.

The teachers are the best kind I have had in my academic journey and there is possibly nothing that is required to be done in order to improve! They are amazing at what they do!

It is not a department, it is a feeling of belonging to that place that moment that is cherished in there.

Maybe sometimes it's good to go beyond the curriculum and have conversations that may be related to life skills and what all can be done

This department made one feel capable, loved and cared for. Academically all the teachers ensured the availability of quality resources, delivered structured lectures and tried to make it as interactive and involving as possible.

N/A

Maybe more choices/better papers being offered as a part of the coursework.

The assessment mode should ensure the students learn more and have critical thinking rather than just going through traditional way examination/assignments of paraphrasing the same textual words.

No

No suggestions

No feedback

It is the best!

I had my best time in Psychology department and it was just because of our very friendly facilities.

I have been extremely satisfied with the teachers and their pedagogy.

None

Incorporate more practical exposure by collaborating with practitioners and clinicians.

No

Gargi Applied Psychology Department has been my safe space for the three years of college. While the department became home, the members became a family and I am grateful that I became a part of it.

The psychology department of Gargi College is THE BEST amongst all such institutions teaching similar courses and deserves the highest ratings there are availing. They not only teach psychology but also model us to imbibe it in our daily lives

I hope the department will continue to nurture each student in the coming years the very same way our batch in the past years have been taken care of.

It is a non-judgmental place with such great professors. This place is therapeutic, where we all got such irreplaceable unconditional positive regard, and every professor saw a great potential in all of us and made us polish that.

No:)

I just wish for everyone to be able to experience this dept once. It's everything one could ask for! All my love to everyone there.

The course structure becomes heavy at certain points in time of the course. It becomes difficult in those situations to grasp the subjects being taught and understand it at the core. Due to this reason I felt detached to some of my papers. Albeit, a lot that was taught has been extremely helpful for me and continues to help me navigate through not just my field of practice but in my every day life. Even though I practice photography now, I often find myself going back to psychology for answers and as points of reference, a research mechanism that my teachers and the curriculum have built in me.

As far as I can remember the teachers took utmost care in keeping the students involved in the course with class discussions, assignments and feedbacks ..They made sure that the key points were clear to everyone before moving forward with the chapter.They also provided with the course materials when the books were not readily available/ accessible.

The teachers would know about each and every student. I was going through a tough time in my third year and every teacher was very supportive and empathetic. The teachers make sure that the students are not overburdened with work.

They have encouraged all of their students to come and talk about to them in case anything is troubling them.

We used to have practical groups and our practical teachers always used to ask each and every student about their well being . Sometimes the activities we performed during those practical classes helped me in generating self awareness. The level of transparency in interacting and working with teachers was extremely good.

Department always felt like a family . Every credit goes to their hard work and teachings. Not only me but my family and friends knows how much I appreciate every teacher in the department .

They have helped me with my emotional stress as well as in career counseling

We don't just have teachers, they are also our counselors. We've recieved moral support during time of submissions and examinations. They've further ensured that we get adequate space to try out new things for the department.

Constantly mentoring the students Guidance on career options Constantly guiding on topics which students found difficult to understand

Each and every faculty member treats the student as their family. Coming to the department everyday felt like coming home even after passing out. Teachers keep in touch with even after you leave college. My teachers have checked on me and extended their support by motivating me during my college years and afterwards when there was a family tragedy. The department has all my love and respect all the time and I always quote them as my guidance wherever I go.

The kind of classroom environment they created and supported throughout the college years helped a lot.

Being an ECA student I always struggled to manage between my course work and the music society work. The faculty has been extremely supportive and understanding throughout my time in the course and I wouldn't have been able to manage without their unconditional love and support.

They were always approachable and dependable. Ready to listen to us and help us. They made efforts on their own too. Helped us in personal development!

They have nurtured us and taught us something new every single day, both in terms of Psychology and life in general. I can say my present day personality has been made by the teachers in Gargi! They were always enthusiastic for trying out new things to provide us with more exposure.. even if that meant increasing their workload manifold (in terms of practicals, assessments, dissertation and so on).

During all the tough times the teachers have been a huge support in providing love and encouragement.

Informal interactions and sessions for students

There was a Happiness Day, then mental health week.

We were in the fyup batch, they listened and empathized with our frustrations. They also helped us many times with emotional support for our personal issues.

The teachers in Psychology Department of Gargi are extremely intelligent and learned. The teachers are regular with their lectures, their lectures are not just theory but are clubbed with real life examples and their own experiences. The teachers make the students understand the concepts better through use of videos and movies, and some class activities as well. They are not just focused on finishing the syllabus but also give time to address the doubts of the students while at the same time managing completing the syllabus on time. The lectures are very connecting and insightful. They make us think out of the box and not just take in everything as said in the books. The practical classes with the teachers make it much more easier to understand things as individual attention is given to students in a small group. The practicals are also being done in an orderly manner with most of the learning happening out of it. The teachers check the practical reports with utmost sincerity and help students improve their writing styles as well. Valuable feedback is given by my teachers. The teachers also make sure to take feedback from the students as well to improvise from time to time according to the class's needs. Apart from studies, emotional and mental support from the teachers has been the most important part. The teachers are always available for the students (even after working hours). The teachers of Psychology department make sure that no student is stressed out due to studies or even any other personal matters. Full support is given to the student. The environment of the department is very welcoming and not intimidating. Teachers, students as well as the admin staff of the department understand problems of the students and behave sensitively towards them. De-stressing activities are also planned for students such as celebration of Children's day or Happiness day or just simply taking out time for students to talk about their concerns. One can never feel negative in the department with this much support.

All the teachers knew the students personally as it was a small batch. They interacted freely with the students and were always available in case of any difficulty. We were always motivated to better ourselves and even after we left college we were in touch with them

Along with academics, one's personal growth is in consideration. Teachers are sooo good at their craft & provide warm & encouraging space to learn, make mistakes and grow!

Our lecturers have taught us not only psychology but exemplified in their behavior human touch, compassion, values of warmth love and understanding with discipline and knowledge which I have imbibed till date.

They were always available whenever had doubts regarding the subject. Apart from the academics it was such an open communication with the teachers that we could also discuss about our issues and how to overcome.

I have always been supported and validated by the faculty during my years at the department and even beyond that. Questions pertaining to coursework was always deftly handled too.

All of our teachers have made sure that we are not overburdened with any assignments and use to give us ample time to do our work, and use to guide us effectively whenever we felt stuck. They have always made sure that we create our own perspective on things we studied, are well researched before we come to any conclusions, deepening our understanding and have helped us to find a balance of study and creating memorable experiences in college. They have helped us in polishing our overall skills and have guided us throughout sometimes through our personal confusions as well.

Apart from educating us through a precise yet interactive teaching process, there were light hearted discussions on the study topics, sharing of personal reflections which made the degree journey more personalised an experience. The teachers took care of our individual development as well as development as a group.

The teachers provide an environment that is accepting, open to exploration and comforting. We had discussions, one on one sessions, and class moments too when it was all about the students, any issues or problems they were facing and how it could be dealt with. The most amazing psychology department till date!!

Na

By considering students personal limitations, helped students recognise their strengths, available for students even after college hours under odd conditions.

Available to speak with when I was going through a rough patch and understood my needs.

Personal issues could also be discussed. Rapport with teachers have been such that we have made lifelong relationships.

They made sure that we had sound mental health throughout our time there. They made sure that we drew life lessons from our time there

By providing extra support to aid in our personal spheres. By providing a very warm and inclusive space.

Majority of my professors were compassionate towards the students and would take their concerns into consideration while making decisions related to submission dates, etc.

Department teachers ensured that they are approachable and accessible to the students as much as possible. They by virtue of being there taught me how to prioritise my own mental health and well being.

The teachers have been there whenever I have had any doubts about the subject matters. They have been patient and understanding if the concepts required more time to understand. They have made themselves available to discuss beyond the course.

-

The teachers at Gargi have always cared for our well-being, such as in terms of our health issues or family issues, etc. One could always approach them with any personal or academic challenges and they would make sure to help us out.

It was a very secure environment provided to us where we given opportunities to excel not just at curriculum but at whatever we college activity we wish to pursue. Teachers played role of mentors and guide to help us address concerns pertaining to both personal and professional life.

The department teachers pushed me to follow my interest and would take out time to ask regularly about my progress.

The faculty of psychology department is extremely sensitive towards the mental health issues of the students. The teachers always welcomed us all whenever we needed to connect with them not only for studies but for discussing personal problems as well. The constant support and guidance of the teachers helped us all to get through the difficult times. The department overall is very responsive when it comes to talking about mental health issues not only in classroom discussions or seminars but a t a personal level as well!

Yes, they have been helpful in understanding our personal problems

The teachers time and again paid attention to the mental health of all students and extended support beyond academics and the classroom. In that pursuit, many seminars and workshops were organised over the course of our degree.

N/A

None

No

No

The time I spent in the Psychology department of Gargi is so special to me, it felt like a family, I can't put into words the support, guidance and teaching our professors gave there. They were super professional, yet very warm and understanding. It was a great learning and growing experience.

University needs to have better infrastructure if students are expected to submit dissertations. We did not have full access relevant articles and journals to conduct a research. Even for assignments, having access to current research in the field would help students develop analytical and critical skills, practice academic writing and gain well-rounded theoretical and practical knowledge.

Please invite us for an alumni meet!!

My feedback would be this— 1) recruit keeping in mind expertise (knowledge) + skill sets (critical thinking) + mindset (student centric or not) and ped methods of a person, 2) trust students to do their best and prioritise maintaining a safe space for your students rather than academic performance under pressure; the former drives intrinsic motivation over a longer duration. 3) encourage questions and discussions regardless of if you know the answer or not. I think teaching psychology is a lot about how to think rather than what to think. This is a great way to get student feedback too. And if you take student feedback, students will always feel valued in your classes and your courses will reach more people. Other than that, thank you for the effort and dedication you have all put in! It's here that I learnt about research and human behaviour first and those two have taken me to greater opportunities in my professional and personal life. And asking questions especially is what I'm valued for as an employee today! Thank you for equipping me with powerful tools to understand, enquire, and test.

None. Incorporation of placement opportunities/ skills would be great

-

The department is heartwarming!

If it wasn't for my professors I doubt our course alone could have brought in growth in critical thinking. The curriculum lacks in teaching us applications of it. The basics are definitely thorough, but to set us apart in the field of psychology, it isn't enough.

Wishing everyone the best of luck . Thank you for teaching me not only psych, but also a Lot about myself

The Applied psychology dept. of Gargi College makes you a better version of yourself. You become more sensitive of each other's beliefs, feelings etc. We all go through a lot of self awareness. We get to explore ourselves. To be empathetic, non judgemental, and accept others as they are.. All these I've learned from the department.

-

I have been fortunate enough to be taught by extremely learned, empathetic, and compassionate teachers. The department has transformed me into a more knowledgeable and smart individual.

The Psychology Department of Gargi College is extremely empathetic, considerate and value all students equally.

None.

My 3 years in this department have shaped my character in the most fulfilling way, the nuances of being a good person. The most enriching environment has been provided by all the professors and the learning has contributed to my overall development.

Most of the teachers are amazing, especially our permanent faculty. But a few teachers have been unfair at times and the students have had many complaints.. I know it's difficult but it would be great if we could have other teachers instead of them

This is one of the warmest and safest place I have spent my time into. Teachers and staff are non-judgemental and amazing human being along with inspiring professors, This department deserves the best

-NA-

No

Students should be given opportunity for more practical exposure via internship and research work.

The curriculum defined is fantastic. However, if the number of reports to be written each semester can be reduced, it would help the students focus at length on the ones that they eventually write and not make it seem like any homework that needs to be copied or just mindlessly scribbled.

None.

A small course could be added regarded career options after the degree.

The strength of the teaching staff has to be increased because sometimes even the teachers are overburdened with work.

NA

I am extremely thankful to all the teachers in the department .I believe it's their contribution in my learning and experiences that has helped and still helping me in every opportunity coming my way. I could feel a great change in my personality , the way I think , talk and learn things in my life after graduating from department of psychology . Psychology department has helped me becoming a better version of myself to which I'll always be thankful.

Gargi college and it's teachers have provided me the best time of my life . Very grateful to the institution .

More alumni meetings with retired faculty

None

The department definitely sets you up for success and I nurture my bond with my professors till date, and I hope that continues well into my future. Thank you for being not just a place for professional development, but my home.

Most of the best moments of my life has been with the department and learnt life lessons from my respected teachers.

NA

NIL

NA

Gargi College's experience led me to attain Doctoral degree in Clinical Psychology from a reputed American university, Wright State University, complete APA-accredited internship at Forest Institute of Professional Psychology and, recently will be completing 10 year work anniversary as a Staff Psychologist-International Students Focus on October 20, 2020. I am grateful to every teacher I came across during my education span 1993-1996.

More support and understanding for ECA students

All good :)

I have no negative feedback for Gargi Psychology Department. The teachers have given us immense knowledge and innumerable opportunities to learn and grow. Gargi Psychology Department has been a magical place, and all teachers create that magic every single day in the lives of students :)

None.

-

N. A.

It was the best time of my life in terms of personal and academic growth. My brain felt stimulated and I have never managed to have a similar experience to undergrad after that.

All mentioned above.

The course could include more practical knowledge from the first year itself as opposed to theory. This would further the interest of the students

Creativity & questioning is appreciated ! Faculty is extremely good:)

The lecturers of applied psychology department are the best

I was an introvert child, one day one of the professors appreciated my work in the class after which I felt confident. So, I think if appreciations can become a part of the classroom it can build confidence of the child.

NA

Overall it is an amazing experience that any student can have in the college life full of fun filled memories and valuable lessons to learn.

The curriculum should have more of applications of psychology- Consumer Psychology and Behavioral Economics Quantitative Psychology (Statistics should be taught more - Maybe using Coursera etc.) More application oriented learning. Positive Psychology was a small part, but leadership, EQ and positive psychology could be more given that psychologists would be required in a number of different fields eventually

It ticks all the boxes with respect to the features needed in a socio emotionally sound educational institution.

The department keeps on evolving with every batch, which is in itself an important requirement. Keep being awesome teachers! 😊

Na

We can always work more on providing practical exposures and real life connects than set standards.

This was a great program! I learned a great deal and it enhanced my professional and career development

The department Has been a great support throughout my journey from the graduation to my PhD in psychology. Coming from a job-psychology background teacher's made sure that they explained everything from the scratch. It's been such a lovely experience!

Probably curriculum add on for DU at large- try to add more about psychology in the corporate world, not restricting to HR

-

.

It was the best 3 years of my life.

I think the faculty is really good however, the course and syllabus in itself could be revised to equip the students to be able to gain some practical knowledge/skills in the field.

Always indebted to Gargi Psychology Department for the wonderful experience that I always cherish.

None.

Transitioning from school to college was an unknown space but Gargi and my Applied Psychology department made it so smooth and worth it. Till date, I haven't seen this level of dedication of the professors in any other college known to me. Honestly, the training and teaching was so deeply ingrained in me that today I am at a position where my critical analysis skills (teachings of KM Ma'am and NP Ma'am), quickly glancing and grasping a concept (teachings of SB Ma'am), counselling skills (teachings of NP Ma'am and SR Ma'am) and ability to be calm and composed (teachings of PN Ma'am) are highly appreciated at my workplace and I am so thankful and grateful to those three years of my graduation. It was simply magical.

No

The three years spent at Gargi helped me shape my future and grow as a person. I'm very glad that I chose Gargi' Psychology Department for my graduation.

Quality research work has always been supported by our Department, I hope it remains the same always.

My three year experience at the department was a great learning experience, which helped to become not only a good psychologist but also a very sensitive, authentic person.

Dept of Psychology gave me the strong academic and professional foundation on which I am building my career. Will be forever grateful.

No

The teachers cultivated a safe space in the department and created A fertile ground for academic growth.

Q1 - The department provides/ provided adequate institutional support in terms of curriculum delivery

Q2 - The teachers are punctual, come in well prepared and communicate effectively with examples and applications relevant to the curriculum

Q3 - The teachers regularly incorporate feedbacks from the students and improvise from time to time to optimize teaching learning outcomes

Q4. - The department/teachers look out for the wellbeing of its students over and beyond the curriculum requirements.

Q5 - The assessment process in the curriculum is transparent and fair

Q6 - The course has added to your overall growth as a critical thinker and has been a productive investment of your time.

Q7 - Any other feedback/suggestions

Any other feedback/suggestions

No I am satisfied :)

No

No

No

I feel very lucky to have such an understanding department of teachers. Even when online college started and we shared our issues about online classes with the department. Immediate and effective action was taken to make online college easier for us.

With online classes maybe we can have one single link for one subject as its a lot of work to figure out different links on different apps.

No suggestions I want them to stay same

No

Im really satisfied to say the least .

No

NA

I am satisfied and really happy with the faculty and the department.

Everything is so organized in the department.

No.

I'm extremely satisfied with the how the department functions. Didn't expect college to be as full of warmth as it is when I was in school.

The college and our department is amazing. I am proud to be a part of it.

Online is extremely hard

No, everything is good as it can get in these times.

No everything it so smooth & so satisfying.

Please validate with concrete examples how the department/teachers have looked out for your overall wellbeing.

Text Entry

When the students suffer from something then can reach out to department teachers as they understand their problems and give them some suggestions.

The department teachers are extremely helpful, not only with academics but also with general life problems. They have time and again assisted students when they were not feeling well, physically or mentally.

The teachers are sensitive to the requirements of every student. They understand the need of effective communication and are open to new ideas. The classes are very interactive and well-planned which help us all to a great degree for not only knowledge acquisition but also for exams.

Alot of teachers before they start teaching in the class ask how have we been. They also give us liberty to contact them directly in case we're facing any problems personally as well as academically.

They start the classes asking us how we have been in last days, they are theirs experience which is really motivating to start a class, their ppt are very helpful...they are really gives glimpses of the paper. They give flexible material for study available at anytime to clear doubts and also give flexible time to do and submit assignment. Amazing teachers..😊😊😊😊 Lucky to have them.

Since the schedule was becoming really hectic for the students, the teachers decide upon dividing our practical classes into online and offline. Once a week in the online classes the group meets and discusses the practical, on the offline days we are assigned tasks to finish in the class time so that we keep making gradual progress. Other that this, the teachers also start their classes 15 minutes late so that the students get the much needed break in between lectures.

Teachers were always there listening us , for all our little and big issues . for me teachers are big support system in this hard time .

Our teachers are extremely dedicated towards students. They teach us in us very well and are very understanding towards each and every student in the department.Learning is really fun with them and I really love their teaching methods and styles. Our department provide us comfortable space and provide good facilities to us.

Not only have our teachers been constantly asking us how we are doing and how are we holding up with everything, but they have also given us the opportunity to choose how we want to go about online classes. They have considered our opinions and suggestions for making the online classes easier for everyone and have implemented whatever was possible. Apart from this, even during usual times (before the pandemic), our teachers have always been providing us with appropriate academic material as well as kept us informed about opportunities for events around us. They have made sure to let us know that we can approach them anytime regarding any issues that we might face.

They always ask us to approach them if we have any concerns and listen to us very patiently. They try to maintain a positive and warm environment which makes us feel comfortable and connected to the department.

No I am satisfied with overall performance of the department teachers
N/A
None
The no. Of practicals in 3rd year is too overwhelming.
Department of psychology is best...it's teachers and lab staff is really good.
As long as we have online classes, every student should be issued a Google suite account from the college which they can use for academic purposes. Personal emails should be avoided.
I am really thankful for my teachers.
I really like our teachers, they are caring towards student needs, they are not only teachers but they are also mentors for me. All the teachings in the class are so meaningful, which will going to help me not only in my professional life but also in personal life.
