

Upholding the traditions of our College, our faculty members at Gargi continue to add on to the glories of our University during this centenary year!

To create a lasting impact and paying it forward to the medical community and research scape, our young colleague has come with a brilliant patent that will help in stabilizing the movement in mice that will enhance focussed radiation and drug administration for trial studies thereby leading to better study outcomes for future generations! Congratulations Dr. Rashmi Saini for this brilliant feat!

The Patent entitled “Flexible Mice Restrainer for Hind Limb Tumor Radiation Exposure” (Patent No-427549; dated 31/3/2023) was granted by the Indian Patent Office, Intellectual Property Agency, New Delhi, India.
